EGO Actuators Steam Generators

The use of steam ovens in the kitchen is a global trend and a modern way of preparing food. We combine the advantages of our EGO Thick Film Heating Element with compact system design in this innovative solution.

Bake with Steam: EGO Steam Generators

Steam generators from E.G.O. are compact, powerful and can be easily and flexibly installed in furnace systems based on our EGO Thick Film technology. Direct steam generation generates a constant and highly controllable amount of steam.

Advantages

- Continuous steam output
- Precise control
- Detection of lime deposits
- Minimal space required for installation

EGO Actuators

Motor Heating Pumps

Precisely matched components guarantee efficiency and performance. But that's not the only thing that makes the EGO Motor Heating Pump for dishwashers stand out.

The best possible performance is also ensured by a simple change of the motor speed thanks to the flexible adjustment of water pressure and flow rate. Our customers, their customers, and the environment benefit equally from this perfectly coordinated system.

Power for washing: EGO Motor Heating Pump.

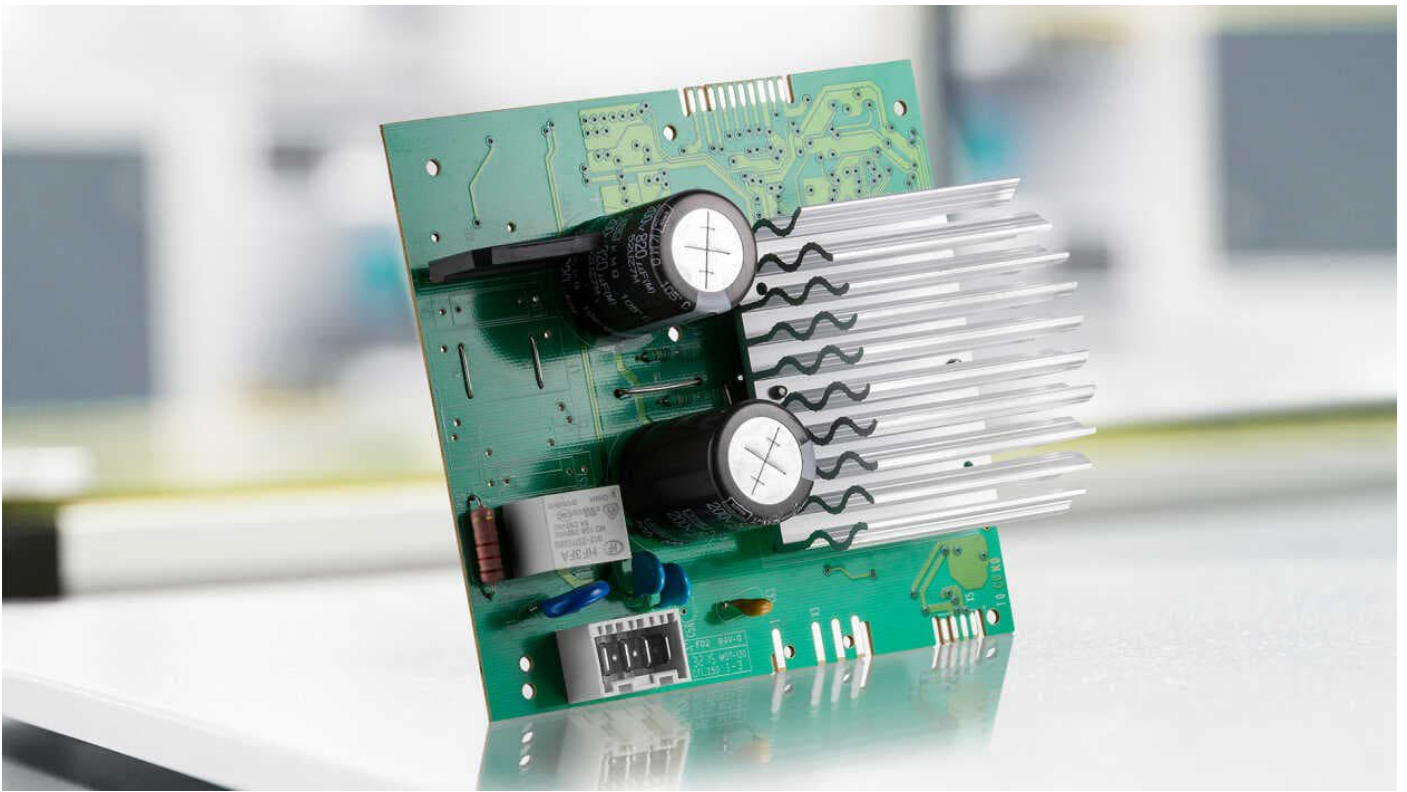

The EGO Motor Heating Pump consists of three components: the motor, the heating element, and the hydraulic system.

We have combined the fast and powerful EGO Appliance Heating with Thick Film technology with the latest generation of highly efficient brushless motors. The EGO Thick Film Heating System has little mass, but a high thermal power density. Combined with special temperature sensors, this enables efficient control of the water temperature.

An additional sensor layer allows the temperature developments on the immediate surface of the EGO Thick Film Heating System to be monitored. For example, the EGO Motor Heating Pump can automatically detect limescale deposits through so-called "hot spots" and notify the user or initiate automatic descaling.

Advantages

- Lower energy and water consumption
- Improved safety level through continuous monitoring of the operating condition of the facilities.
- Precise temperature control (+/- 1 percent accuracy)
- Fast temperature change (< 1 sec)
- Minimal space required for installation
- Faster washing process

EGO Actuators Motor Controls

Modern household appliances need a variety of drives for their components. The EGO Motor Controls offers specific solutions for all applications in a single unit!

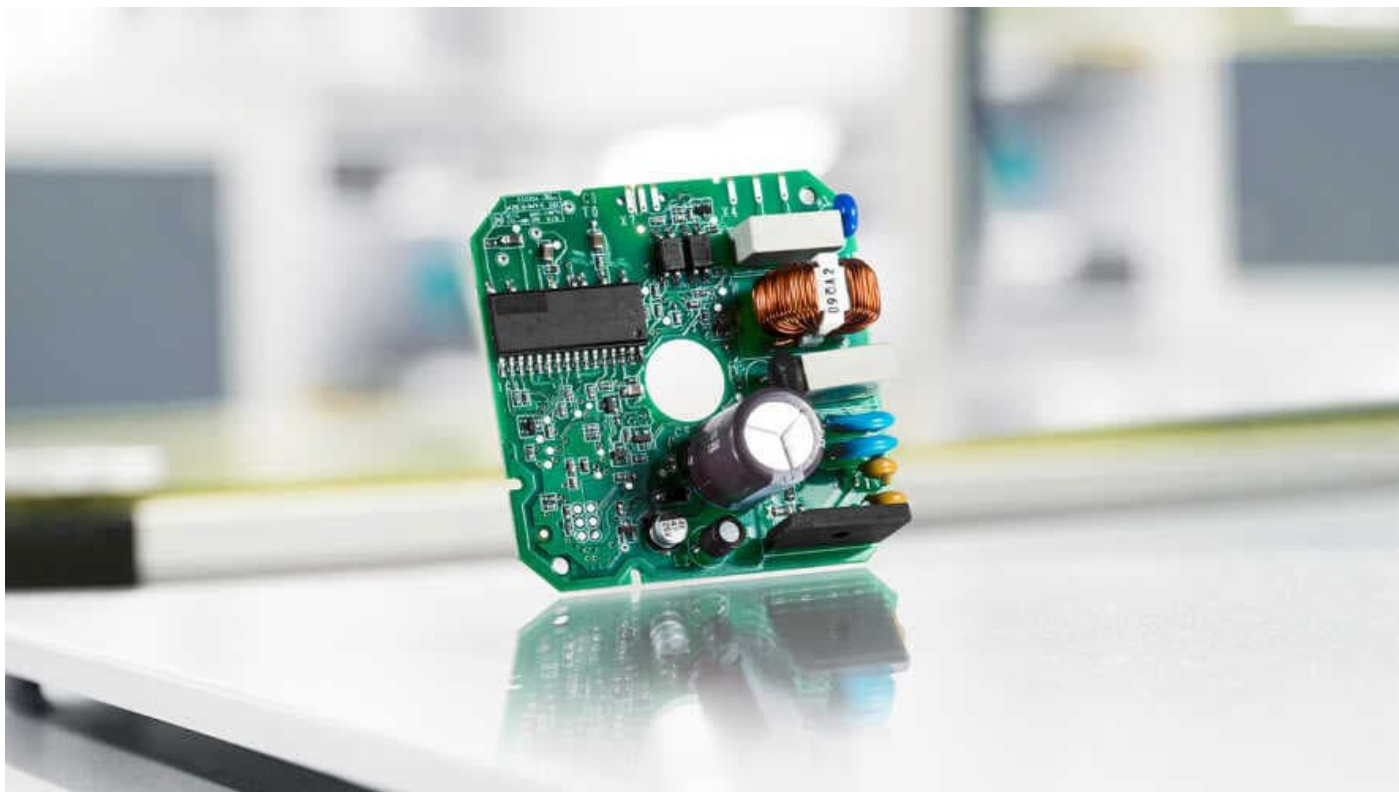

The drive for the device: EGO Motor Controls

From simple circuits to complex inverters for BLDC motors, EGO Motor Controls offer specific solutions for all applications - from dishwasher pumps and washing machines in private use to large, commercial laundry equipment and inverters from 70 W to 7.5 kW. The drives are very rugged, virtually noiseless, and extremely efficient, which contributes to the high energy efficiency rating.

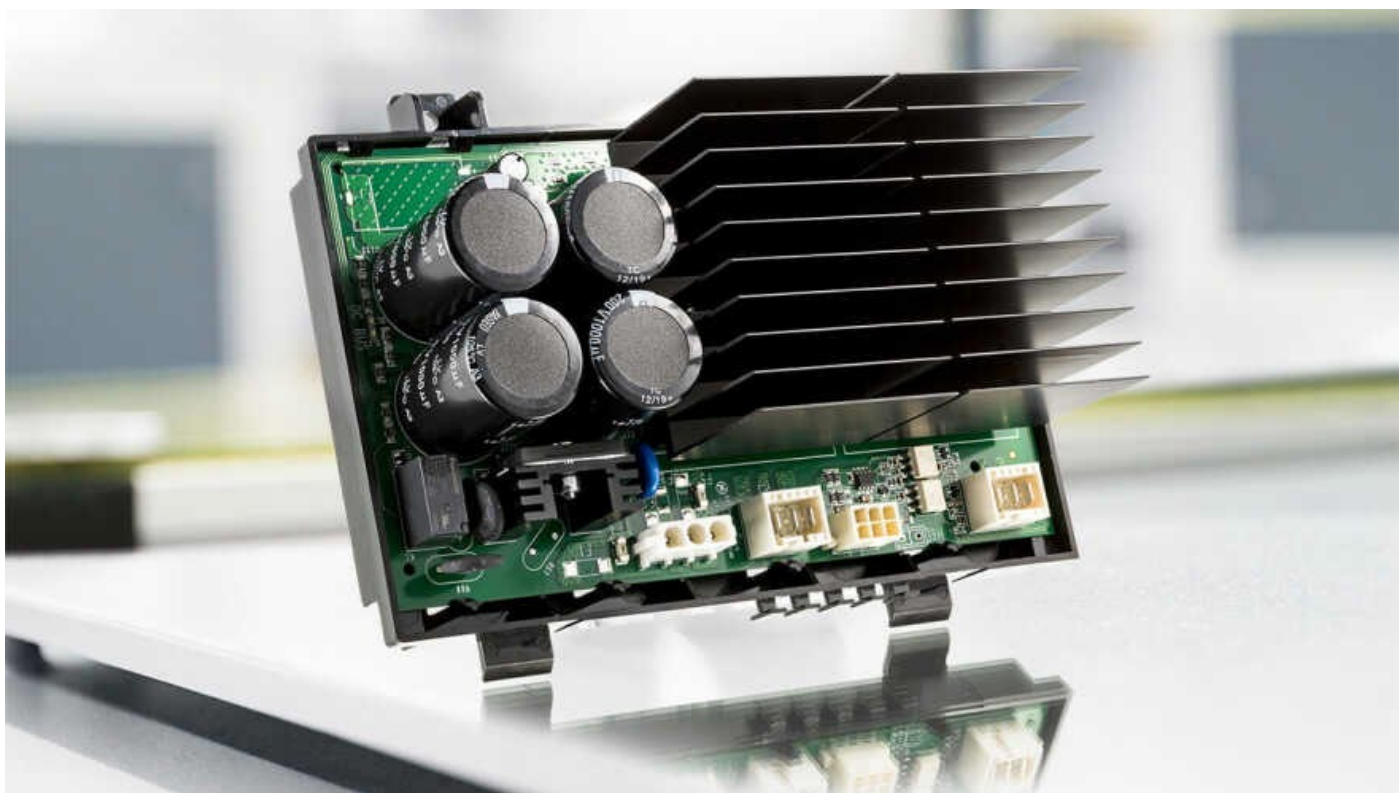

Advantages

Fast market launch thanks to modular EGO Drive software:

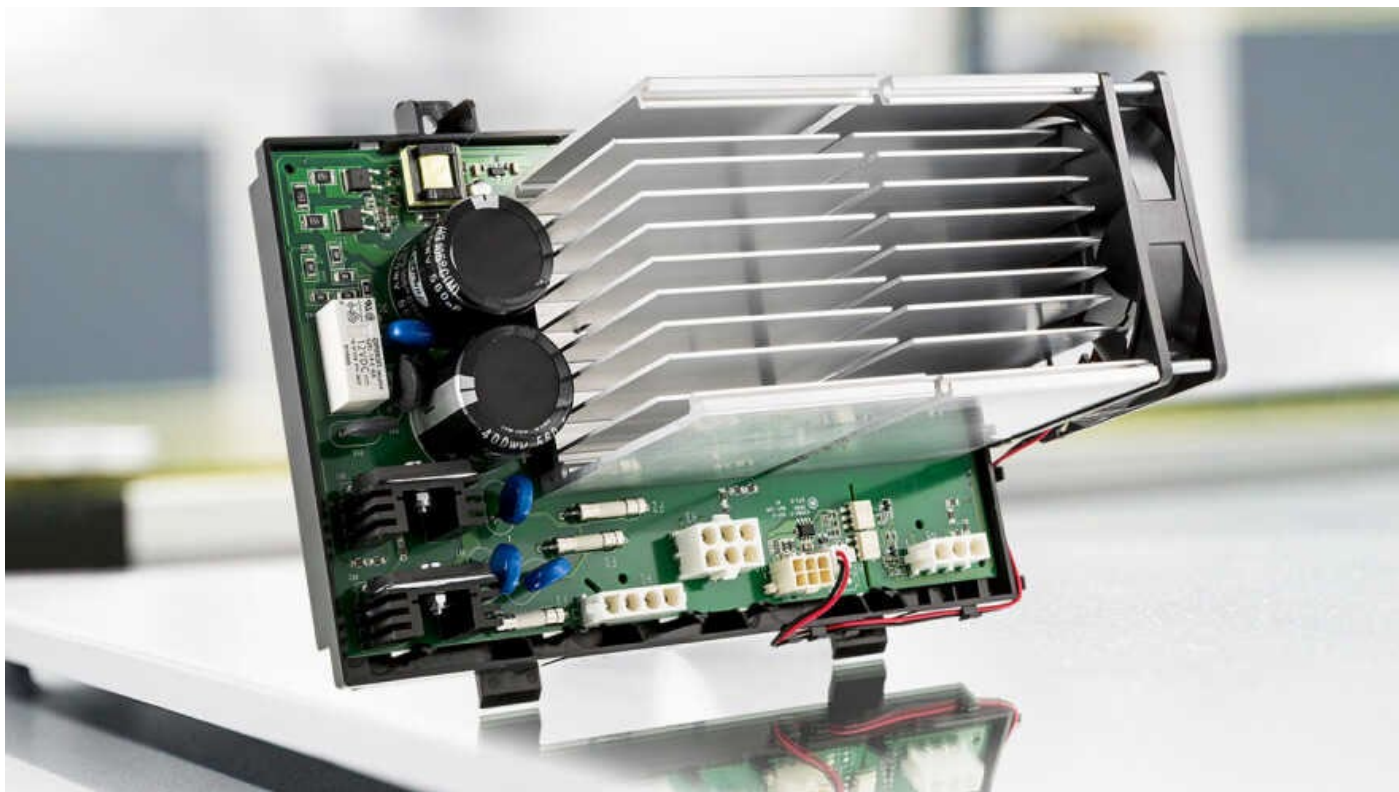

- Easy adaptation to any brushless motor available on the market
- Additional information through virtual sensors: absolute unbalance, diagonal unbalance, and weight sensor
- Sensorless inverters
- 110 V and 230 V variants
- High efficiency
- Extremely durable
- Silent

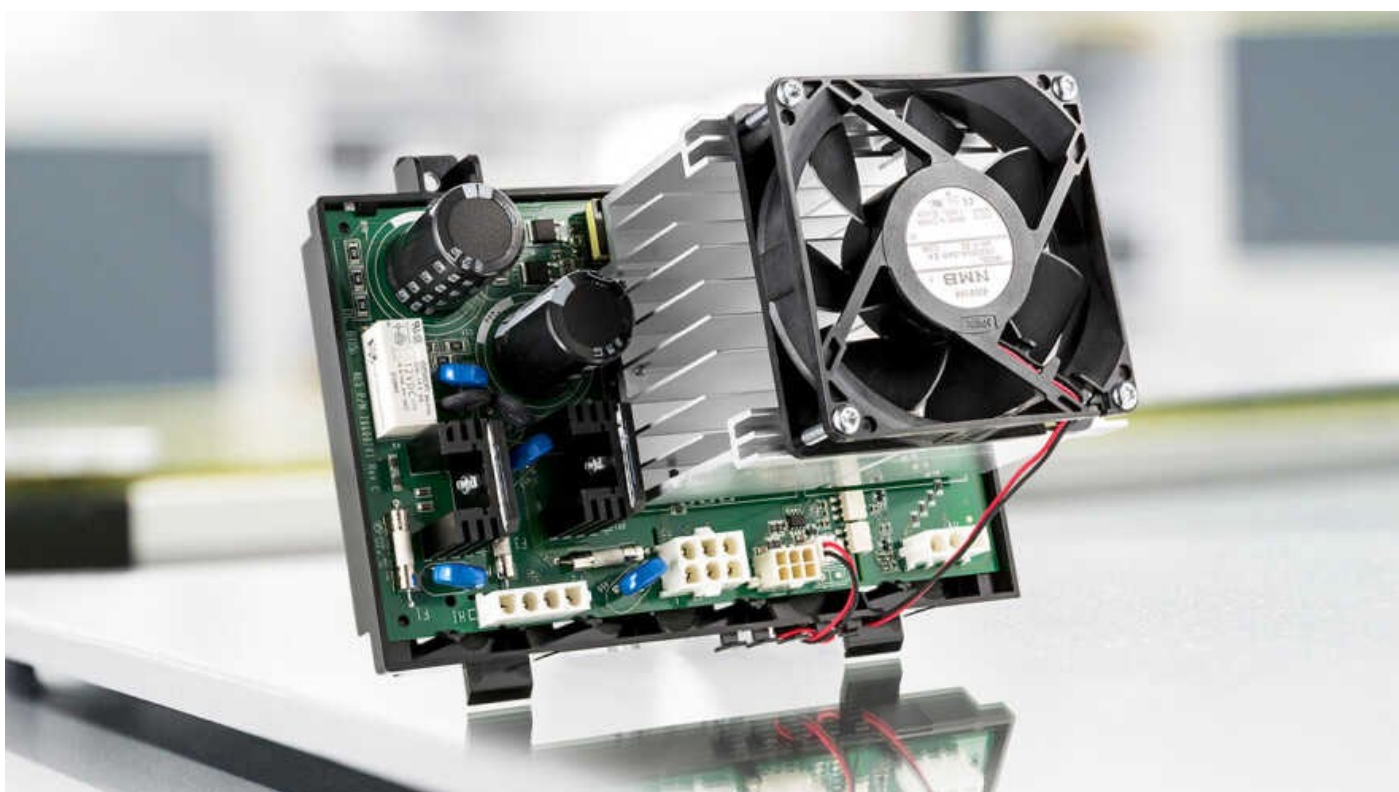

Inverters for Dishwashers (EGO DW Inverter Platform)

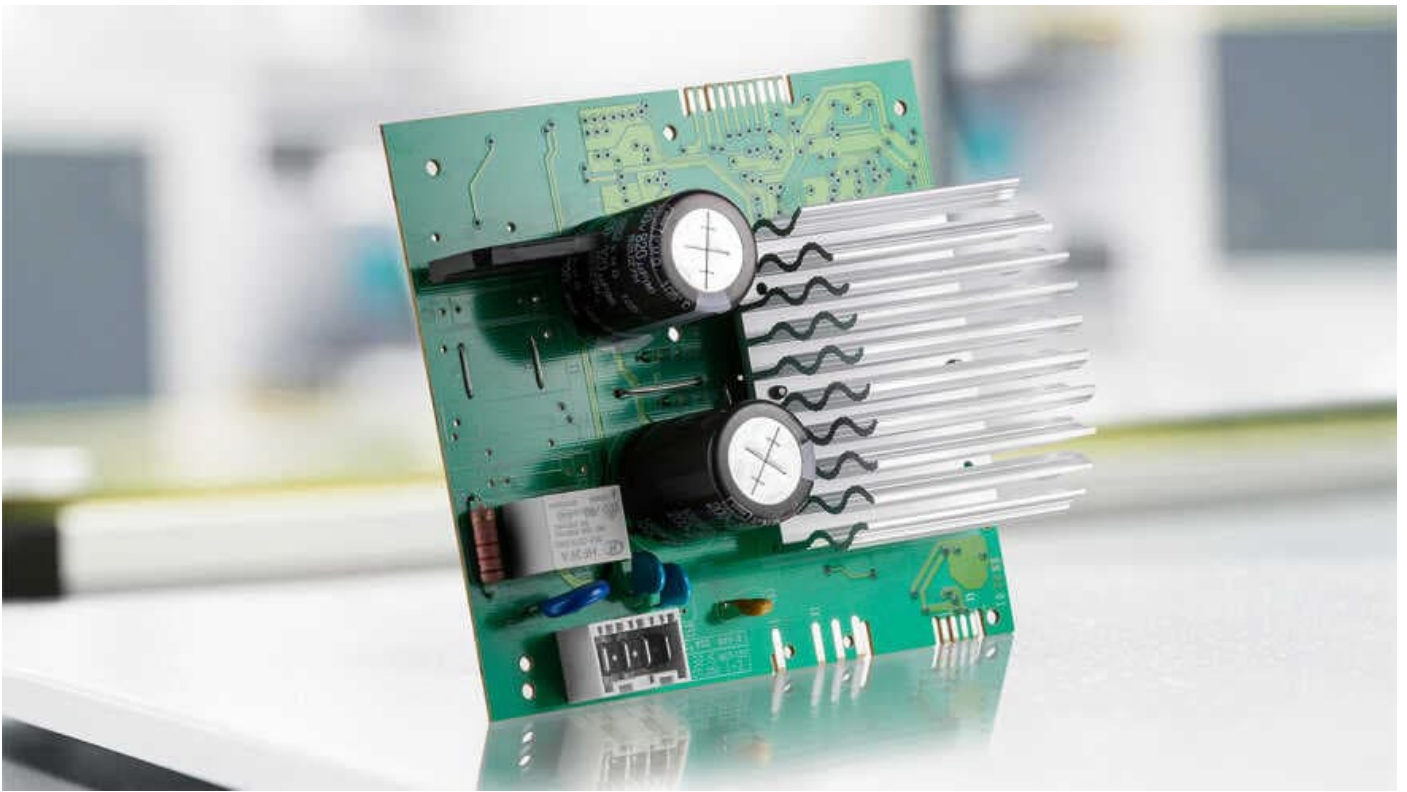

Inverter for professional Dryers (EGO Dual Inverter 1HP 240V Single Phase)

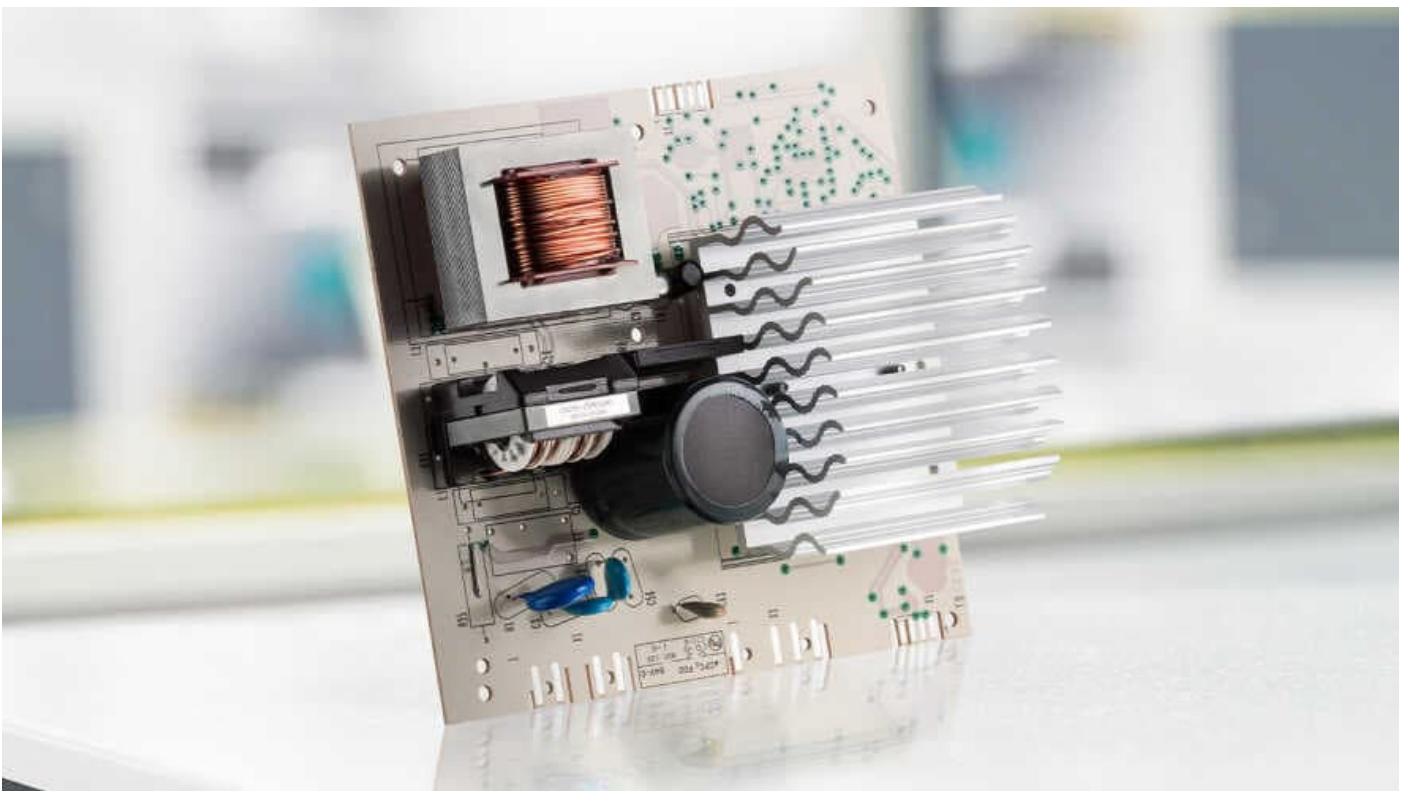

Inverter for professional Dryers (EGO Dual Inverter 3HP 480V 3-Phase)

Inverter for professional Dryers (EGO Dual Inverter 1HP 480V 3-Phase)

Inverters for Washing Machines (EGO Phoenix 9 110 V)

Inverters for Washing Machines (EGO Phoenix 8R Inverter)
